Hi Mike

Please find attached the Traffic Report from Capital Traffic instructed by the applicant in support of the applications for the new property and stables at the above.

Please do not hesitate to contact me if you have any queries

John Jackson

Dear All,

Please find attached a copy of our speed survey results and visibility report. The report shows visibility requirements to be between 55m and 65m, which from the site location plan appears to be achievable.

If you need any further information or clarifications, please do not hesitate to come back to me. Our invoice will follow on shortly via post.

Kind regards,

Jonathan Thompson IEng FIHE MSoRSA

Director

Capital Traffic

Hi Jonathan,

Please go ahead with the traffic study as discussed with the Caroline. You can send the invoice by email or to A A Thamarakshan 6 Beverley Rise, Billericay, Essex, CM11 2HU. My understanding was that the Highways officer had recommended a "speed study to record the actual speed of vehicles using the section of Lambourne Hall Road". Will this be covered in the report? Please let me know.

Regards

A A Thamarakshan

Please see the attached e-mail.

Please could you confirm to this consultant to proceed with the traffic study. Please also advise him of the name and address that you want the fee/account to be issued to.

Please confirm to me that you have dealt with the matter.

Many thank Ashok

John Jackson

Hi John,

Finally got to speak to Caroline on Friday and tried to email you back but we have temporarily lost our internet service at the office. Working from home today where I do have Internet.

She has provisionally agreed what is required, which is an Automatic Traffic Count and a report on achievable visibility. We can undertake this for a fee of £550 +VAT. I can get the counter unit laid in the next couple of days, which will stay down for 7 days collecting data. Once this is complete I will need a further three days to complete and issue the report.

If you could confirm instruction I will get things moving.

Kind regards,

Jonathan
