Comment	<p>Hi</p> <p>When exiting Rose Way, the high metal fence severely restricts the view onto the busy main road of Purdeys Way. The thick metal bars appear to blend into a solid mass when you draw level next to them giving no vision through them at all even headlights are not visible through them and you need to pull right out onto Purdeys Way to see if its clear, which is dangerous as its so busy and people speed. There are often lorries parked around Montine too which makes it even more dangerous to pull out. There's already been some near misses (including one with a bike) and I fear its a matter of time before there's a collision. I would encourage you to visit the site and try and pull out of Rose Way to see how treacherous it is due to the lack of visibility caused by the huge fence.</p>
