

HILLVIEW
THE DRIVE
RAYHEATH
ESSEX
SS6 8XQ.

ATTN. Mr. RICHARD KILBOURNE
23/00630/FUH.

16.10.23.

Dear Sir,

Further to my objection on line to the above planning application re "Midhurst" The Drive SS6 8XQ. I mentioned that I would follow up with a letter.

I would like to say, the reason I never objected to the two previous applications was that I felt that the application was a back land development and using the Old corrugated workshop as part of the proposed dwelling, that it had no chance of succeeding.

It was subsequently refused permission. It is worth noting that on this application the applicants supporting statement gave the measurement of frontage as 38MTRS. and on the later application has been ~~corrected~~ ^{changed} to an assumed boundary at 34MTRS. in line with his front boundary fence and brick wall edging his ^{to} front driveway/ parking area including lamp posts.

The subsequent 2021 application we took very little notice of as we had assumed, incorrectly, that this would never have been passed, we were wrong!! We do therefore find ourselves having to accept that he has gained approval for the three bedroom bungalow with access via a shared driveway.

The accompanying statement says that the property is 34MTRS wide at the front to The Drive and 42MTRS wide at the rear and is some 60MTRS in depth. One can clearly see that the white

concrete boundary fence at the front of the property clearly highlights, at where it finishes adjacent to "Hillview" the 34 MTRS assumed boundary also supported by a brick wall and lamp posts edging his car park area. all on the 34 MTRS boundary as shown on the attached Google Earth picture showing the measurement with a line through the middle of the roof of "Midhurst" boundary to boundary. Please also note that the concrete white fence finishes with a half panel clearly to finish at the 34 MTRS.

A. new application is in front of you to vary condition 2, by not handing over so much of the garden to the "new build" and by also moving the boundary of "Midhurst" by some 2 MTRS closer to "Hillview" is an effort to give the new build its own driveway. This is now clearly what we object to for the following reasons. I understand that RDC will not enter into a boundary dispute and that my objection will not alter the planning permission already granted but I can't see how you can approve the driveway.

1. In the application it states that the applicant owns all the land in question. This is not a true declaration!!
2. The land between "Midhurst" and "Hillview" was unfenced and always has been until 2022/3 when the present occupier has cleared all the trees and shrubs/scrub. This land cleared is owned by "Hillview" and more importantly has an open ditch that is vital to taking away surface water. There can be no way that RDC can allow a driveway to fill in this open ditch.
3. If you go onto the Government UK web site "Check the long term flood risk for an area in England" you will find that "Hillview"

is listed as "High Risk from surface water flooding"
Some years ago, I think 2010, my wife and I, accompanied
by a next neighbour, spent all evening and most of
the night outside our front door with brooms and electric
pumps in an effort to stop our bungalow flooding.
THIS DITCH IS SO IMPORTANT TO US IT MUST NEVER BE
FILLED IN!! This ditch links up to another ditch that
runs to the rear of our properties.

The applicant has been claiming every inch of land
since this planning approval. The ditch at the bottom/rear
of his property, right where his new build is to be
created, has been filled in and piped with the
boundary fence now being on the Western side of
this ditch. (Drawing attached). Earlier on this year
"M. Dhust" advised me that the ditch running over
my property must be blocked as the water is not
flowing through on his side!! My ditch was not
blocked but as he has piped the ditch his side
with a small diameter pipe the water is unable to
flow at a fast enough speed. A problem that
has been created by his own action clearly
showing the importance of these open ditches to
carry away surface water!!

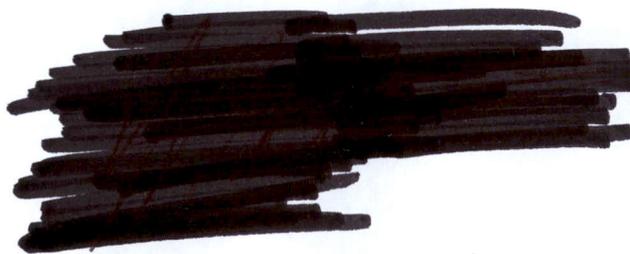

My concern is that if you approve this latest
application, we at "Hillview" will for sure flood!!
The new independent driveway (although not on his
land) cannot be allowed. These ditches must be
left open.

In my complaint on line I suggested that 5 feet
of my land had been taken for this independent
drive. Since then I have managed to push a
tape through the fence and can confirm it is
2 meters ~~wide~~ is this enough for a driveway

especially with 29" Bin's storage" that are shown on the plans at its entrance from "The Drive". They will have to have very small cars!!

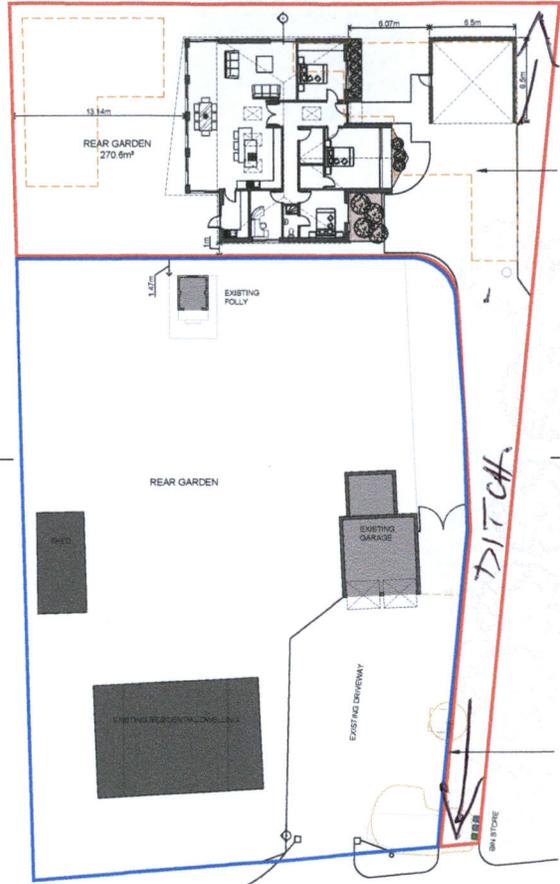

I have an objection therefore to the driveway for reasons explained so hope that this application is refused for the reasons I have given.

Yours faithfully -

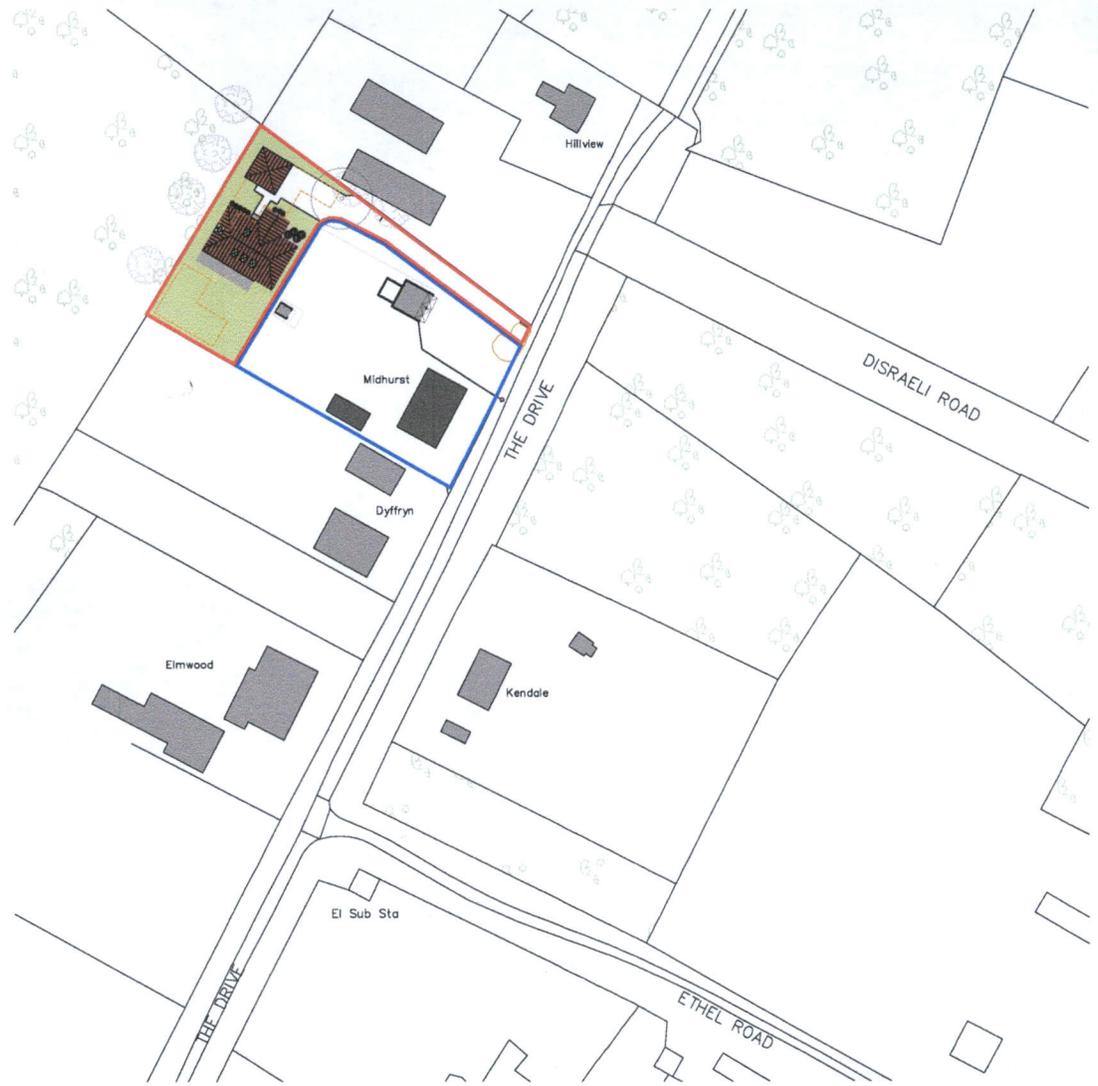

G. T. HATCHERSON.

P.S. I have all the original plots (maps) showing all the ditches if you require to see.

DASHED ORANGE TO BE DEMOLISHED

Check the long term flood risk for an area in England

Use this service to find out:

- the long term flood risk for an area in England
- the possible causes of flooding
- how to manage flood risk

This service tells you about an area's long term risk from:

- rivers and the sea
- surface water
- reservoirs
- groundwater (where data is available)

Check the [flood risk in Scotland](https://map.sepa.org.uk/floodmaps) (<https://map.sepa.org.uk/floodmaps>), [flood risk in Wales](https://naturalresources.wales/splash?orig=%2fflooding%2fcheck-your-flood-risk-by-postcode%2f&lang=cy) (<https://naturalresources.wales/splash?orig=%2fflooding%2fcheck-your-flood-risk-by-postcode%2f&lang=cy>) or [flood risk in Northern Ireland](https://www.nidirect.gov.uk/articles/check-risk-flooding-your-area) (<https://www.nidirect.gov.uk/articles/check-risk-flooding-your-area>)

HILLVIEW, THE DRIVE, RAYLEIGH, SS6 8XQ

Rivers and sea risk

Very low risk

Very low risk means that this area has a chance of flooding of less than 0.1% **each year**.

Surface water risk

High risk

High risk means that this area has a chance of flooding of greater than 3.3% **each year**.

Lead local flood authorities (LLFA) manage the risk from surface water flooding and may hold more detailed information. Your LLFA is **Essex**.

Reservoir risk

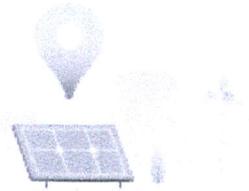

Flooding from reservoirs is unlikely in this area

Groundwater risk

Flooding from groundwater is unlikely in this area
