

Steel Palisade

Galvanised security palisade

Triple-Point Pale

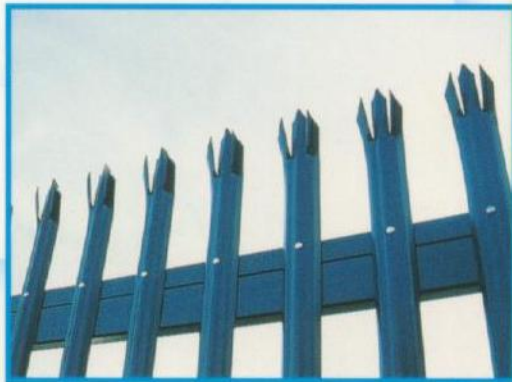

Round & Notched Pale

Green plastic coated palisade

Available in a wide variety of specifications, our palisade fencing range is flexible when it comes to meeting the requirements of it's application and supremely rigid when installed.

By collating our 15 years of experience with this product, we can offer a solution to meet your needs. Fencing Supplies Steel Palisade is supplied as a component system that is easily assembled on-site. The nature of this system allows differing components to be specified at the point of estimating, in order to meet the security needs of the application at hand.

As well as security, we acknowledge that the consumer may also seek a standard of appearance that is not intrusive to surroundings and this is particularly true where palisade is used in school or recreational projects.

As a result of this we offer a full Polyester Powder Coating service in a vast assortment of colours so that finding a match with the intended environment is effortless.

As well as the fencing itself, we also pride ourselves on our range of matching Palisade Gates that can be inserted in a run of fencing to allow access of any nature, from pedestrians to large vehicular plant.

Our vast production capacity allows us to hold large stocks of standard material and, by taking advantage of the economies of scale, we can supply quickly at extremely competitive rates.

Fencing Supplies Steel Palisade The Ultimate Perimeter Deterrent

Specifications
